SUMMARY

A software engineering student and generalist web developer, my primary skills lie in creating powerful yet easy to use user experiences, automated test creation, and development process improvement. I am a strong believer that no development task is finished until it is fully documented and has test coverage. I am searching for a position where I can utilize my current skills to the fullest and pick up new skills. I am eager to learn and passionate about new technologies.

SKILLS

LANGUAGES	DATABASES	FRAMEWORKS	TOOLS
• PHP	• MySQL	• Drupal	• Git
• Javascript	• MongoDB	• jQuery	• Composer
• HTML5		• Zurb Foundation	• Selenium
